The Impossible Turned Possible

By Callum Gardner

In the beginning, there was a ball, a ball of hot dense cosmic inflation. 13.8 billion years ago, this ball expanded faster than the speed of light, in this moment space, time, and matter was created but also gravity, electromagnetic force strong nuclear force, and weak nuclear force was created. All of these forces are the fundamental needs for a stable universe, without them our universe would collapse. Also the first ever war happened in the first millisecond of the universe, it was between a good bacteria vs a bad bacteria, and luckily the good bacteria won, this war is way more important than world war 1 and 2, as if good bacteria lost, we wouldn't be alive today.

Fast forward a few billion years, when the universe was cool enough stars could form the Sun formed "Umm, hello... anyone out there" the Sun said fearfully to the dark void of space "Why is it so... dark" he goes on to add, and it was true he may be the Sun but he can't see his light "hey little guy, I would run, that star is about to go supernova" a random star says to the Sun, "No, no please, don't go" the Sun says more nervous than a ant being stepped on. After maybe... another few million years, a new gas planet formed from the same things the Sun did, a start planet? No it's way to small, it's Jupiter "Hello, who are you" Jupiter says confused "I am the Sun! And your my planet, my first ever

planet!" The Sun says, ecstatic to have a friend now "Oh, hi I guess" they talk for a little while, Jupiter feeling more comfortable every year until a new planet came to be, a bit smaller than Jupiter, but still really big "Um, hi.." Saturn says, confused "Hi bud, what's your name" Jupiter asks "Um, Saturn I guess" Saturn says "HI SATURN!" Sun, you just cut me off "Oh sorry" Anyways, Saturn was scared like Jupiter a big gassy guy but very soft "What is this place" Saturn says, a little shocked from the Sun's mass "It's space, and by the way, my name is Jupiter Jups for short" Jupiter says, trying to make Saturn feel more comfortable. They start getting along after a while, Uranus and Neptune come to be a little after, and everything is going to plan with the Sun's... idea. "I wish I could come to your side of the asteroid belt" Jupiter says, feeling sad "Well don't, Jupiter you will cause all the rocky planets to crash" and weird planet name X says with a low tone of voice "I know, wait who even are you" Jupiter says with confusion "I am X, planet X" Planet X answers "Well, hi.. X was it" Jupiter says "Yes it was-" X gets cut off "Anyways, Saturn how could I cross?" Jupiter asks "When the Sun stops looking, cross" Saturn answers "NO, don't do that, trust me" Planet X adds "Planet X, it will be fine, I will just cross and we will all be happy" Jupiter answers "Jupiter! Cross, the Sun isn't looking" Saturn says with speed" Jupiter crosses, not listening to X and that's when he realised the mistake he made, all the baby rocky planets crash, making a war of destruction "Oh- oh my gosh, I am so sorry X" Jupiter says very scared X will tell the Sun "I warned you, and you didn't listen. If you don't tell the Sun I will, do you understand me" X says with anger "Yes, yes just give me time, please" Jupiter says with worry

“Just know this, if the Sun doesn’t by the time I am back, I will tell him” X adds on.

Jupiter got what he wanted but at what cost, he is on the other side of the asteroid belt but also is the reason of the destruction of the early rocky planets. The Sun will go mental if he finds out but he has to tell him or X w- “Have you told him” X says cutting of the narrator “X, just give me some more time” Jupiter says quickly “I told you what would happen if you didn’t tell the Sun, move out my way” Planet X says with anger and frustration “X please, I will tell him, I promise” Jupiter says, scared “you had your chance, move” X says pushing pass Jupiter and moving rapidly towards the Sun “No!” Jupiter shouts, and in the moment Jupiter uses his gravitational force to pull X back “Saturn, help!” Jupiter says “On it” Saturn adds they booths work together to pull X back “I won’t be silenced” Planet X says before... “AHHH” Planet X shouts, Jupiter and Saturn’s gravity was to strong... X just got flung out the Solar system! “What did we do.”

It’s been a long time since the Jupiter incident and all of a sudden a new planet formed, this time though it was a rocky planet... multiple rocky planets! 5 to be exact “Um, hello anyone-” Mars says but gets cut off “HI MARS, I AM THE SUN” the Sun says, scaring Mars “Why do you have to shout bruh” Proto says with a cocky tone “Bro, stop being rude” Venus says, annoyed at Proto “Hi guys” Mercury adds, not knowing what’s going on “Hi Mercury, I am Thaya” Thaya says with a kind tone, after they all go to their designated orbit the Sun gives them, they all get along Proto and Mars become best friends, Venus and Mercury have this love, hate relationship, Thaya and Venus also get along really

well. Randomly Proto starts being really rude, cocky and very egotistical "Proto, can you stop" Thaya says "Stop what, is someone getting mad" Proto adds, being rude. This goes on for a while until Thaya goes to talk to the Sun about it, but she learns something way more significant than arguments "When will these planets get... life" the Sun says, Thaya hearing" she keeps listening, and she does not like what she heard "Life, Proto, all of this is crazy" She says rushing back to her orbit, but she bumps into Ear- I mean Proto "Oh, hi Proto" She says "Was up Thaya" Proto says with his casual egotistical tone "Proto, come with me, we need to talk" Thaya takes Proto to a more private area, she explains everything to Proto, and suddenly Proto goes from this cocky rude planet, to this nice, kind, and chill planet.

They speak for hours, getting along really well, as if gained feelings for each other... "Proto, something has to happen for this life thing to work you know" Thaya tells Proto "We are going to have to... touch" Thaya says, a bit romantically "WHAT! Your joking, right... right" Proto says, very scared "No I am not, but you will survive, you are bigger than me, and it's what I want, please let me" Thaya says with a soft voice "WHAT WAS THAT, THAYA" the Sun says, really mad "That will NOT happen you two are going far away from each other" The Sun says, there is not changing his mind "Please Sun, we can make life like this, you just got to trust us, if you let us do this, your desires would be fulfilled, I know what we have always wanted a planet with life, so this is your chance. But if you don't and you separate us, we might get hurt more than if we just did, well this. So Sun, please" Proto says surprising Thaya "NO!" The Sun separates them, Proto on the opposite side of the Solar system to Thaya, but Mars and Venus encourage them to,

well touch when the Sun isn't looki- "Go! Proto it's your chance Go!" Proto, and Thaya both go towards each other and the speed of sound, the Sun tries to stop it, but it Proto and Thaya are going to fast.

BOOM! They crash, merging into well the Earth and Lunar (the Moon) and there it is, water, land, atmosphere. They did it, Life is a thing... but at what cost, humans have just used Earth for granted, World war 1 and 2 started genocides, no equality, maybe if was for the best for life to not come into be. But that's why we have God, he saved humanity, and gives us the chance to enter the Golden Gates of Heaven.
